Specialty cleaning agent

Specialty cleaning agent.

A mildly foaming cleaning agent in liquid form for removing oil, grease, dust, dirt, and protein stains from textile and hard surfaces.

Effective against: Grease, Oil, Dirt and Food (protein) stains

Field of use:

- Offices and public facilities: where carpeted surfaces require cleaning.
- Manufacturing and Industrial plants: where grease and oil stains are present on alkaliresistant surfaces such as tile, PVC, stone and many other plastic or rubber surfaces.
- Interior cleaning of autos, buses or trains: where carpeted or other textile surfaces require cleaning.

Product benefits:

- Economical to use because the buffered formula does not lose it's cleaning strength when diluted.
- Highly effective because it was specifically formulated for use in Floor Care and Spray-Extraction equipment.
- User and environmentally friendly due to a high degree of biodegradability
- Suitable for use in foodstuffs industries (Labor Dr. Boehm, Munich)

Description:

Textile and hard floor cleaning in office buildings, schools, hotels, restaurants, banks, exhibitions rooms, etc.

Application:

- **Spray-Extraction equipment:** Depending upon the degree of soiling to be removed, TopWash should be diluted to between 1 – 3% solution. Mix between 100 and 300ml of TopWash with each 10 liters of water. Follow the application instructions for the machine. (e.g. Apply TopWash solution, and extract it while it is still wet. Then go over the same area with clean water, extracting it while wet, to rinse the surfaces). For stubborn stains, specific spot-cleaning solutions can be applied with a small hand sprayer before TopWash is applied.
- **Floor Care equipment:** Mix TopWash in a dilution of between 1:50 (2%) and 1:20 (5%), depending upon how dirty the surfaces are. Apply, scrub and pick up according to the instructions with the machine.
- **Hand Cleaning:** Dilute TopWash 1:50 (2%) to 1:20 (5%) and apply with a brush or sponge. Rinse the cleaned area thoroughly with clean water.
- On textile surfaces, it is best to do a small test of the color-fastness of the textile, before using TopWash.
