Alcaline disinfecting cleaner

Alcaline disinfecting cleaner.

A liquid, alkaline, foaming product that simultaneously cleans and disinfects. DES 3000 kills bacteria and fungi and inactivates many viruses.

Effective against: Bacteria ;Fungi ;Viruses.

Field of use:

- Food Processing Plants: for cleaning of surfaces soiled with oils or fats AND which require disinfection.
- Hospitals and other Public Facilities: for cleaning and disinfecting bathrooms, showers and therapeutic tubs.
- Dairies: for cleaning and disinfection of milking and milk storage equipment
- Bottling Plants: for cleaning and disinfection of bottling equipment.

Product benefits:

- Foaming capabilities allow the detergent to stay longer and work better on vertical or irregular surfaces such as tanks and machinery.
- Economical to use because it is highly effective at very low concentrations.
- Biodegradability ensures simplified disposal of waste water after cleaning.
- One detergent to clean and disinfect is more economical and more efficient than using two different solutions.
- Formulated without Aldehydes, (formaldehydes) which require special precautions.

Description:

Floor and hard surface cleaning in slaughterhouses, bakeries, butchers' shops, cheese-making plants, canteens, agriculture, pharmaceuticals plants, etc.

Application:

- **High Pressure Washers:** DES 3000 is specifically formulated for use with high pressure washers, and works best when applied with a Foam Lance and Injector. Higher concentrations result in shorter disinfecting times. 1% solution = 4 hours 2% solution = 1 hour 5% solution = 15 minutes
- **Pre-Spraying equipment:** If possible, use pre-spraying equipment that creates foam. Apply in the same concentrations as for High Pressure Washers, above. Do not let it dry on surfaces.
- **Hand Cleaning applications:** Using suitable skin protection, DES 3000 can be applied with a brush or sponge. Do not let it dry on the surfaces.
- Surfaces and equipment disinfected with DES 3000 must be thoroughly rinsed with clear water before contact with foodstuffs.

- Standard equipment

Model	DES 3000 SV1 25 L
Ref. no.	105301641
Technical specifications	
Packaging	25 L
Class/packing group	8/III
Ph value	7.5-8.5 (1% solution)
UN number	1760

Field of use:

- Food Processing Plants: for cleaning of surfaces soiled with oils or fats AND which require disinfection.
- Hospitals and other Public Facilities: for cleaning and disinfecting bathrooms, showers and therapeutic tubs.
- Dairies: for cleaning and disinfection of milking and milk storage equipment
- Bottling Plants: for cleaning and disinfection of bottling equipment.

Product benefits:

- Approved according to EN 13697 and EN 14476 for use against viruses, bacteria and fungi
- Foaming capabilities allow the detergent to stay longer and work better on vertical or irregular surfaces such as tanks and machinery.
- Economical to use because it is highly effective at very low concentrations.
- Biodegradability ensures simplified disposal of waste water after cleaning.
- One detergent to clean and disinfect is more economical and more efficient than using two different solutions.
- Formulated without Aldehydes, (formaldehydes) which require special precautions.

Alcaline disinfecting cleaner.

A liquid, alkaline, foaming product that simultaneously cleans and disinfects. DES 5000 kills bacteria and fungi and inactivates enveloped viruses.

Effective against: Bacteria (*Staphylococcus aureus*, *Escherichia coli*, *Enterococcus hirae*, *Pseudomonas aeruginosa*). Fungi (*Candida albicans*) and Viruses (Enveloped viruses).

Approvals: EN13697 and EN14476.

pH Value 9,5 (1% solution)

UN Number 3082

Packaging Group 9/III

Application:

- High Pressure Washers: DES 5000 is specifically formulated for use with high pressure washers, and works best when applied with a Foam Lance and Injector. Higher concentrations result in shorter disinfecting times.

1% solution = 4 hours

2% solution = 1 hour

5% solution = 15 minutes

- Pre-Spraying equipment: If possible, use pre-spraying equipment that creates foam. Apply in the same concentrations as for High Pressure Washers, above. Do not let it dry on surfaces.
- Hand Cleaning applications: Using suitable skin protection, DES 5000 can be applied with a brush or sponge. Do not let it dry on the surfaces.
- Surfaces and equipment disinfected with DES 5000 must be thoroughly rinsed with clear water before contact with foodstuffs.
- Normal disinfection : 2,5% solution (250 ml for 10 l water) at 20°C
- Heavy disinfection : 5% solution (500 ml for 10 l water) at 20°C
- For bacteria : (*Staphylococcus aureus*, *Escherichia coli*, *Enterococcus hirae*) 5% solution. Contact time 5 minutes at 20°C
- For full anti-bacterial effect according to EN 13697 : 5% solution. Contact time 30 minutes at 20°C
- For full anti-viral effect according to EN 14476 : 2,5% solution. Contact time 15 minutes at 20°C
- For effect on fungi : (*Candida albicans*) 500ml in 10l water 5% solution. Contact time 30 minutes at 20°C
